

## **Getting In + Getting Around:**

Once you arrive at SO36, you'll find three steps at the main entrance, with a handrail on the right-hand side. To the left of the entrance, in front of the stairs, there's a call button below a display case that you can operate using a Euro-key.

You can use this button if you need assistance at the entrance — for example, if you require the accessible entrance. When activated, someone from our team will come to assist you.

After entering and walking a short distance straight ahead, you'll find a cloakroom through a small passage on the right. There is a slight downward slope in front of this cloakroom. Behind it is the smoking room, which has a swing door and is fairly narrow. Back in the hallway from the entrance, you'll find another cloakroom window on the left side.

Continuing straight, on the left side, there is an accessible toilet, which can be opened with a Euro key. If you don't have a Euro key, you can borrow one from our door staff. The toilet is directly opposite the door, and the sink is installed on the left side.

Back in the hallway, continue straight up a slight incline. You'll pass two fire doors, which you can recognize by small thresholds.

Before the first threshold, the all-gender toilet is on the left. Just after the first threshold, also on the left, is the FLINTA\* toilet.

You'll recognize the event space by the threshold of the second fire door.

The interior is shaped like a long rectangle. You enter at the short back end, where the bar is located directly on the left. At the far left end of the bar, there's a swing door, and just to the left of it is a wall with another call button that can be operated using a Euro key.

This button allows people at the bar to get attention if they might otherwise be overlooked. On the right-hand side of the room, there's a bench running along the full length, a good place to sit down. The stage is about 25–30 meters straight ahead. At some events, a raised platform is set up. If you need to use it, you can register by emailing [post@so36.de](mailto:post@so36.de) at least one week before the event.

The platform will then be set up on the right-hand side, about halfway between the entrance and the stage.

Now you should have all the info you need for a great visit to SO36.

We hope you enjoy the event! If you have any questions or if anything is unclear, feel free to email us at [post@so36.de](mailto:post@so36.de).
